

ROSS N. MITCHELL

Earth Dynamics Research Group, School of Earth and Planetary Sciences, Curtin University
Perth, Western Australia 6845 Australia
+61 408 562 003, ross.mitchell@curtin.edu.au

Website: www.supercontinents.org

Video blog: <http://geodynamics.curtin.edu.au/igcp-648/news-reports/six-forty-eight-vlog/>

RESEARCH INTERESTS

- **Earth Dynamics** • Linking observed patterns of the supercontinent cycle (Pangea, Rodinia, Nuna, etc.) and geodynamic models of mantle convection • Interpretation of paleomagnetic apparent polar wander into its constituent tectonic drift and true polar wander (a.k.a., planetary reorientation) components • Holistic relationship between plate tectonic continental drift and true polar wander • True polar wander on ice-age time scales (a.k.a., polar wobble), relevant to the future impact of global warming on ice caps and sea level
- **Earth History** • Geodynamic and tectonic transition from Hadean?-Archean supercratons to Proterozoic-Phanerozoic supercontinents • Linking the rise of atmospheric oxygen to secular mantle cooling • When and why Earth's solid inner core nucleated • Tectonic and geodynamic context of major events in Earth history (e.g., Paleoproterozoic tectono-magmatic lull, the Cambrian Explosion, Proterozoic birth of the supercontinent cycle, etc.)
- **Methods** • **Paleomagnetism** and rock magnetism • Cyclostratigraphy • Paleontology • Structural geology • Stable/radiogenic isotope geochemistry • Petrology • Geochronology

EDUCATION

Yale University (New Haven, CT) 2007-2013

- Ph.D. with distinction, Geology and Geophysics, Advisor: David A.D. Evans
- Thesis: Supercontinents, True Polar Wander, and Paleogeography of the Slave Craton
- National Science Foundation (NSF) Graduate Research Fellowship
- Multiple departmental honors; co-author on multiple successful NSF research grants

Carleton College (Northfield, MN) 2003-2007

- B.A., Geology, Advisor: Cameron Davidson
- Thesis: Late Cretaceous paleomagnetic pole for North America from the Pierre Shale
- Multiple research fellowships from various sources; honorable departmental fellowship

PROFESSIONAL EXPERIENCE

Research Fellow, Curtin University (Perth, Australia) 2016-

Secretary, UNESCO IGCP 648 Supercontinent Cycles & Global Geodynamics 2016-

Postdoctoral Fellow, California Institute of Technology (Pasadena, CA) 2013-2016

- Paleomagnetism Laboratory (supervisor: Prof. J. Kirschvink)

Visiting Fellow, Yale University, New Haven, CT 2013

HONORS AND AWARDS

National Science Foundation Antarctica Service Medal	2016
Philip M. Orville Prize in Geology and Geophysics, Yale University	2013
Estwing Hammer Prize for Field Geology, Yale University	2011
Young Scientist Award, 6 th International Dyke Conference, Varanasi, India	2010
National Science Foundation Graduate Research Fellowship	2008
Carleton College Dean's Office Research Fellowship	2007
Carleton College Dean's Office Research Fellowship	2006
Howard Hughes Medical Institute Student Research Fellowship	2006
Class of 1963 Fellowship	2006

INVITED TALKS

- 2017, Did Earth's first supercontinent form the inner core? *George Mason University, October 19.*
- 2017, Is True Polar Wander a Thermometer? *The Institute for Geoscience Research (TIGeR), 2017 TIGeR Conference "Timescales of Geological Processes", Curtin University, September 14.*
- 2016, Is True Polar Wander a Thermometer? *Applied Geology, Curtin University, November 2.*
- 2016, Was the Rise of Oxygen an Inside Job? *Geochemistry-Land & Surface Processes Seminar, Yale University, October 3.*
- 2016, Was the Rise of Oxygen an Inside Job? *Petrology Reading Group, California Institute of Technology, September 30.*
- 2016, An Explanation of Ultrahigh-Pressure Metamorphism: *Australian Earth Science Convention, Adelaide, Australia, June 28.*
- 2016, Did True Polar Wander Spark the Cambrian Explosion? *University of California Santa Barbara (UCSB), March 31.*
- 2015, Amasia and Supercontinent Formation by Orthoverision: *Eos Trans. American Geophysical Union Fall Meeting, Abstract T026-79474.*
- 2014, A Late Cretaceous True Polar Wander Oscillation: *Geology Seminar, California Institute of Technology, September 15.*
- 2014, True Polar Wander and Supercontinent Cycles: Implications for Earth Properties: *Tectonics Seminar, California Institute of Technology, June 24.*
- 2013, The Supercontinent Cycle: *Rutgers University, April 10.*
- 2010, Supercratons Before Supercontinents? *Eos Trans. American Geophysical Union Fall Meeting, Abstract U32A-04.*
- 2010, True Polar Wander Exploded the Cambrian (and Burst the Ediacaran?): *Harvard-MIT Geobiology Symposium, Harvard University.*

- 2010, Coronation Loop Resurrected: Oscillatory Apparent Polar Wander of Orosirian (2.05-1.8 Ga) Paleomagnetic Poles from Slave Craton: 6th Nordic Paleomagnetic Workshop, Luleå, Sweden.
- 2010, Archean to Early Proterozoic Apparent Polar Wander Path for the Slave Craton: Paleogeographic Prehistory of the “United Plates” of America: *Yellowknife Geoscience Seminar, Northwest Territories of Canada.*
- 2009, Archean to Early Proterozoic apparent polar wander path for the Slave craton: Paleogeographic prehistory of the “United Plates” of America: *Precambrian High Seminar, Geological Survey of Canada.*

TEACHING

- Lecturing, Curtin University, Perth, Australia** 2016, 2018
- *Tectonics* (lead instructor: Prof. C. Clark), lecturing on the Proterozoic Eon and laboratory exercise on paleomagnetism—both original curricula created by R.N. Mitchell
- Guest Lecturing, California Institute of Technology, Pasadena, CA** 2015
- *Paleomagnetism* (instructor: Prof. J. Kirschvink)
- Teaching Assistant, Yale University, New Haven, CT** 2007-2008
- T.A. for *Paleogeography* (instructor: Prof. D. Evans), Fall 2008
 - T.A. for *Natural Disasters* (instructors: Prof. D. Bercovici and Prof. M. Brandon), Fall 2007
- Teaching Assistant, Carleton College, Northfield, MN** 2005-2006
- T.A. for *Structural Geology* (instructor: Prof. S. Titus), Winter 2006
 - T.A. for *Introduction to Geology* (instructor: Prof. C. Cowan), Winter 2005

ORIGINAL FIELD WORK

- 2017 Iceland with C.S. Spencer [1 week] – *Ice-rafted debris and zircon analysis of mantle dynamics*
- 2017 Kimberley region, Western Australia with U. Kirschner [3 weeks] – *Palaeoproterozoic-Mesoproterozoic palaeogeography of Australia and testing oscillatory true polar wander*
- 2016 McArthur Basin of the Northern Territory of Australia with G.M. Cox and U. Kirschner [3 weeks] – *Mesoproterozoic palaeogeography of Australia and organic-rich cyclostratigraphy*
- 2016 Flinders Ranges of South Australia with P.F. Hoffman and G.M. Cox [2 weeks] – *Neoproterozoic snowball Earth events, cyclostratigraphy and testing for glacial erosion*
- 2008-2016 West Antarctic Peninsula with J.L. Kirschvink and E. Olivero [22 weeks] – *Upper Cretaceous magneto- and biostratigraphy and geochronology in the southern hemisphere*
- 2013-2015 Great Valley of California with J.L. Kirschvink and P.D. Ward [3 weeks] – *Upper Cretaceous magneto- and biostratigraphy; tectonic reconstruction of California*
- 2009-2014 Umbria-Marche regions, Italy, with R. Coccioni, J.L. Kirschvink, and A. Montanari [8 weeks] - *Bio- and magnetostratigraphic sampling and lithostratigraphy of the Late Cretaceous Scaglia Rossa limestone; testing Late Cretaceous true polar wander hypothesis*
- 2006-2013 South Dakota and Wyoming with J.L. Kirschvink and P.D. Ward [7 weeks] – *Bio- and magnetostratigraphic and geochronologic sampling of the Pierre Shale; time scale calibration*
- 2009-2012 Montana and Wyoming with W. Bleeker and T. Kilian [11 weeks] - *Paleomagnetic, geochemical, and geochronologic sampling of mafic dike swarms of the Wyoming craton*
- 2008-2010 Northwest Territories, Canada with W. Bleeker and P.F. Hoffman [12 weeks] - *Paleomagnetic and geochronologic sampling of Precambrian mafic dyke swarms and the Great Slave Supergroup of the Slave craton*

- 2009 Ontario, Canada with W. Bleeker and A. LeCheminant [2 weeks] - *Paleomagnetic sampling and mapping of lamprophyre dikes*
- 2007-2009 Adirondack Uplift, New York [3 weeks] - *Paleomagnetic sampling of Neoproterozoic dikes as field-based component of graduate 'Paleogeography' class at Yale.*
- 2006 Central Australia with N. Swanson-Hysell [3 weeks] - *True polar wander hypothesis for global change at 800 Ma*
- 2005 Furlo Basin, Italy with A. Montanari [1 week] - *Cyclostratigraphic investigation of Cretaceous oceanic anoxic event 2*

PROFESSIONAL SERVICE

- I regularly review papers for international journals including *Geology*, *Earth and Planetary Science Letters*, *Tectonophysics*, etc.
- I am a member of the American Geophysical Union and the Geological Society of America.
- I am Project Secretary of the International Geoscience Program (IGCP) project on *Supercontinent Cycles and Global Geodynamics* (IGCP 648; website). IGCP projects are made possible by UNESCO. Supercontinent research, investigating continents globally and with multidisciplinary approaches, fits naturally into UNESCO's charter and has thus far been a great success. On top of normal operational duties, I also maintain video blog in order to highlight particularly exciting research outcomes of IGCP 648. Most recently I conducted a survey about scientific consensus and communication, the results of which should help the community reflect on how to better communicate controversial topics in science. IGCP 648 offers a unique community with which to explore this timely and yet perennial challenge in science.
